# Sunrooms, Windows Patio Rooms & Covers

Est. 1947

Three generations of manufacturing excellence in sunrooms, windows, patio rooms & covers.

# Sunrooms

## Bring the Outdoors Indoors Beautifully!

It's safe to say that most of us love being outdoors. On any given day, if we had the choice to relax in front of the TV or to kick back in a comfortable chair outdoors, the answer would be a simple one. But like most of us, the thought of being outside during the dog days of summer or during winter's painfully cold winds and snow, or the incessant attack of bugs the size of small pets – we will usually opt to remain indoors.

C-Thru Sunrooms is proud to offer you a beautiful solution to experiencing the outdoors indoors, all year round! Now you can enjoy beautiful summer and winter days, dramatic sunsets and watch the snow fall from the comfort of a new climate-controlled C-Thru sunroom!

CURVED EAVE ROOF

**White Curved Eave Sunroom**

- Glass kickplate & trapezoid options
- 1/2 glass, 1/2 solid roof w/shade option
- Electrical system option

**White Curved Eave Sunroom**

- 3' glass door option
- Glass roof option

**White Curved Eave Sunroom**

- Glass kickplate & trapezoid options
- Electrical system option
- 1/2 glass, 1/2 solid w/shade option

C-Thru recycles 98% of all scrap materials after building each sunroom.

# Sunrooms

## Beautiful Curves Ahead

C-Thru's Curved Eave Sunrooms have become the industry standard for beauty and quality craftsmanship. The curved eave style sunroom is truly our premier sunroom and has been a favorite for many years. The curved eave and glass adds a gentle and elegant touch with its smooth transition from walls to roof.

These beautiful sunrooms offer you nearly unobstructed views of the outdoors – whether it be a starry night or a stunning sunset.

- 1. Solid Insulated Roof System**  
*The ultimate for creating your perfect design combination of glass & solid.*
- 2. High Performance Smart/DuraLite Roof Glass**  
*The leading technology in insulated glass and is nearly unbreakable. Also available in single-glass.*
- 3. Comfort Control Insulated Shade System**  
*The ultimate in controlling temperatures, shade and light in your new room.*
- 4. Super Span Structural Rafters**  
*Optional rafter stiffeners allows you to build large rooms or roofs that are unobstructed by mid-span posts and beams.*

# Sunrooms

## Distinctive Design Flexibility

C-Thru's Straight Eave Sunrooms offer a distinctive look and flexibility that are ideal for most homes and installation parameters.

Our straight eave style sunroom allows you to create a year-round paradise with distinctive lines that will accentuate the existing architecture of any home.

These classic sunrooms offer you a private place of escape or a special place to entertain – depending on the mood you're in.

What's more C-Thru offers several room package choices and upgrades. You can add things like ceiling fans, roof shutter systems and outdoor porch lights. To see more information on our room packages and available upgrades, please refer to pages 24-27.

STRAIGHT EAVE ROOF

- Glass roof option
- 6' Sliding door option

Metal free is where you want to be! Minimize metal conductivity – increase energy savings.

# Sunrooms

## Create a Design Masterpiece

One of our most beautiful sunrooms is the refined English Conservatory style. These well-appointed conservatory details add a touch of class and sophistication to your Sunroom that attracts attention, engages emotion and will most likely draw a few envious comments from your friends and neighbors.

There are many reasons to choose a C-Thru Sunroom: design, quality, value, craftsmanship, durability and attention to detail. This attention to detail has resulted in our English Conservatory Sunrooms. Simply beautiful!

**NOTE:**  
*Conservatories are traditionally custom applications and may require special engineering, additional site preparation, custom glass and may require longer lead times than other C-Thru rooms. Please check with your authorized C-Thru dealer for any special requirements that may exist.*

Go green and \$ave green with the best and most energy efficient sunroom available on the market today.

# Gabled Rooms

## Breathtaking Charm and Grace

The C-Thru Garden Room has all the charm and grace of our Sunrooms and features the added beauty of our highly insulated Weather Guard roof system. Your room will remain bright and inviting, staying cooler in the summer and warmer in the winter. Your new Garden Room will quickly become the most lived-in room in your entire home!

The C-Thru Garden Room offers a unique feel with its gable roof design. The vaulted cathedral ceiling and the peaked front wall give a very rich and spacious impression while allowing plenty of indirect light in.

Our Garden Room is the perfect fit for those wanting a sunroom but with a little more of the "room" feeling.

# Gabled Rooms

## A Room for Every Reason

It's true that sunrooms create a beautiful and dreamy retreat for you and your family. But don't be surprised if you find yourself inhabiting your new sunroom more than any room in the house!

By day, your sunroom may become an expansive kids rec room, hobby room or home office. By night, your sunroom may quickly be transformed into a magnificent entertainment area or a romantic getaway. The uses are nearly as endless as the views on a starry night.

## 10 Rooms in 1

- Living Room
- Home Gym
- Family Room
- Kids Rec Room
- Home Office
- Spa Room
- Mud Room
- Breakfast Nook
- Poolside Room
- Hobby & Crafts Room

All for the cost of only one room!

- Roof electrical beam option (with ceiling fans)

Metal free is where you want to be! Minimize metal conductivity – increase energy savings.

# Patio Rooms

## Not Your Ordinary Patio Enclosure

Since its introduction more than three decades ago, C-Thru's Patio Room has evolved into the perfect blend of beauty, functional design and affordability.

We have taken the Patio Room from ordinary to extraordinary! Starting with our insulated Weather Guard roof system, your new room will have a level of year-round comfort not seen in most other Patio Enclosures. Plus, with our extensive list of options and upgrades, like, sliding glass doors, french doors, glass kickplates and upper transoms, you can transform your Patio Enclosure in to a dream come true!

See pages 24-27 for room packages and upgrades.

STRAIGHT EAVE ROOF

# Patio Rooms

**Relax. You're Buying the Best Room with the Best Warranty.**

Another reason to choose a C-Thru Sunroom is that we have been manufacturing the highest quality sunrooms and components for over 60 years. It's this kind of experience coupled with our constant innovation that allows us to confidently offer the industry's most aggressive warranty – for life!

## Beware of Look-a-like Imitations

Other sunrooms may look the same, but unless they bear the C-Thru name, buyer beware!

The many patented and exclusive features we offer mean superior performance for you. C-Thru's products are designed to meet or exceed most building code structural requirements, and have over a half a century of successful installations.

**White Patio Room**

## Have an Existing Patio Roof? No Problem!

So, what if you have been dreaming of a new sun-room, but your home has an existing patio roof? Simple, call C-Thru!

C-Thru offers you a convenient and affordable way to transform an ordinary patio roof in to a year-round paradise. Our engineers will work to manufacture the wall configurations you desire to fit the existing patio roof perfectly.

Depending on the options you choose, you now can easily transform your existing patio cover into a year-round, sun-drenched retreat to watch the seasons change while in the comfort and protection of an enclosed patio room.

**WALLS ONLY UNDER EXISTING PATIO COVER**

*Expand the square footage of your existing patio cover by simply bumping it out with our straight or curved eave roof and walls.*

# Patio Covers

## Open, Airy and Economical

A C-Thru Patio Cover is a beautiful and economical addition to any home. These handsome covers provide an open and airy retreat for you to entertain family and friends or to relax after a long day.

A Patio Cover not only provides a shaded, cool place to enjoy the outdoors, but your home will also stay noticeably more comfortable being protected from the heat and cold.

**Cross Section of C-Thru's Ultimate Insulated Patio Cover**

- 1. Solid Insulated Roof System**  
*C-Thru's patented solid insulated roof system is highly insulated, strong enough to walk on and very low maintenance.*
- 2. Optional Fan/Ceiling Light Beam**  
*Can be placed throughout the roof to attach fans and lighting while concealing all electrical wiring.*
- 3. Heavy Duty Gutter with Optional Leaf Guard**  
*An ideal feature for directing the water safely out of harm's way.*

**Cross Section of C-Thru's Beautiful Glass Patio Cover**

- 1. Solid Insulated Roof System**  
*The ultimate for creating your perfect design combination of glass & solid.*
- 2. High Performance DuraLite Roof Glass**  
*The leading technology in glass and it is nearly unbreakable.*
- 3. Super Span Structural Rafters**  
*Optional rafter stiffeners allows you to build large rooms or roofs that are unobstructed by mid-span posts and beams.*

**Glass Sun Canopy**  
• Header beam option (with brick columns)  
• Available in single or dual glass options

**Solid Insulated WeatherGuard Patio Cover**  
• Post, beam and wrap kit option

**Solid Insulated WeatherGuard Patio Cover**  
• Post, beam and wrap kit option  
• Roof electrical beam option (with ceiling fans and heating units)

C-Thru recycles 98% of all scrap materials after building each patio cover

*Note: If desired, C-Thru's Patio Covers can be enclosed at a later date to create a beautiful Sunroom or insulated Patio Room.*

# Replace your old, tired Windows & Doors

Improve the curb appeal of your home!

C-Thru Windows and Doors come in several styles and offer unique features and benefits

## Good reasons to install new windows and doors

By replacing your old windows and doors you will gain a number of great benefits that continue to pay for themselves day in and day out. Here are a few:

- **Lower utility bills** – as much as 25% or lower, keeping you warmer in the winter and cooler in the summer.
- **Sound proofing** – customers often notice their home is dramatically quieter and more peaceful with new windows and doors.
- **Easy to operate** – unlike old doors and windows, C-Thru's won't stick or jamb as you operate them. They are so easy to open and close.
- **Security** – C-Thru's new windows and doors will make your home more secure. They meet or exceed current codes regarding security.
- **Curb appeal** – there is really no better way to increase the curb appeal of your home than installing new windows and doors.
- **Cleaner** – old windows and doors allow dirt & dust to blow through your home. C-Thru's windows and doors block most of the dust particulates keeping your home cleaner.

OLD ALUMINUM WINDOWS/DOORS		NEW VINYL WINDOWS/DOORS	
ALUMINUM WINDOW	SINGLE GLASS	VINYL WINDOW	SMART GLASS 90
BTU 1400+	U-VALUE 1.00	BTU 2.4	U-VALUE .27
<p> BTU (the lower number the better)</p> <p> U-Value (the lower number the better)</p>			

- 1 **Standard High Performance Glass**  
C-Thru's base model windows come standard with **SmartGlass 60**, high performance glass. All windows can be upgraded to **SmartGlass 90** for additional energy efficiency. All of C-Thru's insulated glass comes standard with **Enviro sealed spacer**.
- 2 **Equal Site Line Sashes**  
C-Thru's windows have equal site lines, greatly improving the symmetry and aesthetic appeal. This is unlike low-quality builder windows that try to save money using less material.
- 3 **Integral Brick Molding Flange**  
C-Thru's windows come standard with a high quality replacement flange. The flange is integral to the window's main frame; increasing the window's strength, architectural aesthetics and preventing leaks.
- 4 **Custom Colors**  
C-Thru's windows are available in a multitude of custom exterior colors to match any home.

## Compare the Visual Differences

### See for Yourself!

These pictures show the industry standard aluminum systems that offers these features:

#### Exposed Screws

*No one wants the look of a battle ship on the back of their home – exposed screws and rivets give you that and more.*

#### Exposed Caulking

*Caulking is essential to a well installed room if you don't want it to leak. Yet the sun's UV rays break it down in a short couple of years, and in no time that clean caulking is a magnet for dirt. C-thru's vinyl thermal clad caps snap over the caulking concealing it from the sun and view, ensuring a long and trouble-free life.*

#### Unfinished, Rough, Butt-Finished Aluminum Windows and Doors

*Unightly? That's just the beginning, this technology is old, 20-30 years old, much like VHS to DVD or Blue Ray. It works, just not that well. Most all of these aluminum windows are unrated, untested and non-approved, lacking in security features, ease of operation and have dramatically lower energy efficiencies.*

Window Corner

### C-THRU'S OMEGA 4

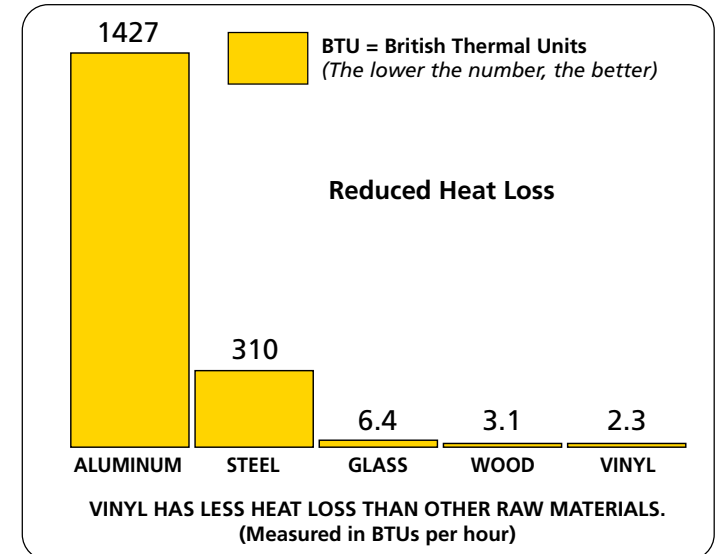

# Room Comparison

## U-VALUE AND R-VALUE COMPARISON

## BTU COMPARISON

U, R and BTU Values change dramatically when surrounded by an aluminum frame. Only vinyl frames achieve the best results.

FEATURES	C-THRU OMEGA 4	INDUSTRY STANDARD ALUMINUM	BENEFITS
Energy Star, AAMA and NFRC rated windows and doors	Yes	No	C-Thru windows are carefully designed & engineered to exacting standards. They have been tested, rated and certified by key third-party agencies. What's more, our windows have been installed on tens of thousands of homes. Most industry standard sunroom windows and doors have never been tested or certified.
Thermal Clad Extrusions	Yes	No	Our thermal cladding is the ideal way to prevent the outside temperature from coming into your room. To cut costs, the industry standard is to use outdated technology and sub-standard materials – that are still unapproved to this day!
30% Federal Tax Credit (up to \$1500) (ended Dec. 2010)	Yes	No	Only Energy Star rated products (like our windows and doors) have this benefit and reward. The aluminum wall systems do not meet these strict energy-saving requirements and do not qualify for tax credits.
Concealed Screws and Caulking	Yes	No	Our thermal clad serves several purposes: It thermally isolates the outdoor temperature and it conceals most all screws and caulking, reducing the damaging effects of the sun's UV rays. The industry standard does not offer these features.
High Aesthetic Appeal	Yes	No	The pictures on page 26 clearly show the aesthetic appeal by concealed the screws, caulking and welded joints. As you can see, the industry standard walls are not visually appealing and do not conceal the screws or protect caulking.
Green Energy Efficiency Technology	Yes	No	C-Thru's Omega 4 rooms are up to 700 times more energy efficient than most other rooms! Rooms are rated for temperature transference & insulation in BTUs – British Thermal Units. Aluminum rooms are rated at 1400+ BTUs, while ours are rated at just 2 BTUs.
Substantial Annual Savings on Heating and Cooling	Yes	No	With our Omega 4 wall system you will be saving money & energy everyday you own it. As an example, a typical Omega room uses 76% less energy to heat and cool than aluminum rooms. That amounts to huge annual savings!

## WARNING!

Be aware of look alike products! C-Thru is manufacturer of one of the only vinyl composite rooms in the country. Don't be fooled by companies that piecemeal vinyl windows and painted aluminum extrusions together. Their products don't have the design refinements or the years of testing and field application that only C-Thru can boast!

# Features: A New Generation of High Performance Glass

	U-VALUE	SHADING COEFFICIENT	SOLAR HEAT GAIN COEFFICIENT	VISIBLE LIGHT %	UV%
<b>SmartGlass 30</b> Clear single glass, most cost effective.	1.0	.89	.85	90%	74%
<b>SmartGlass 60</b> Hermetically sealed 1" thick dual insulated glass unit with multiple layers of low emissivity coating and enviro warm edge spacer seal standard.	.27	.41	.34	70%	30%
<b>SmartGlass 90</b> Hermetically sealed 1" thick dual insulated glass unit with 50% more layers of low emissivity coating than Smart Glass 60 and enviro warm edge spacer seal standard.	.27	.89	.26	65%	20%

**DEFINITIONS:** **U-VALUE** Radiant (non solar) heat transfer thru the glass measured in BTUs / sq. ft. / hours x delta T. **The lower the number the better.**

**SHADING COEFFICIENT** an index of solar heat gain rejection. **The lower the number the better.**

**SOLAR HEAT GAIN COEFFICIENT** Similar to shading coefficient, **the lower the number the better** in terms of heat gain rejection.

**VISIBLE LIGHT %** The amount of visible light allowed to transfer through the window.

**UV %** The % transmission of ultraviolet radiation through the glass unit.

## 1 enviro sealed

This one element of your room, although unseen, is one of the most important part of your windows and doors. It is the spacer between the glass. **Enviro Sealed** is the most advanced energy efficient spacer of its kind. Commonly known as 'warm edge technology' it acts as an insulator between the outside temperatures and you. Unlike old school metal spacers, **Enviro Sealed** is comprised of non-metallic structural elements that insulate incredibly well. It is the longest lasting seal on the market minimizing seal failure, condensation and mold.

## 2 SmartGlass

What makes it **Smart** is the clear, low emissivity coating of silver on the inside of the hermetically sealed glass units. There is no better way to have a comfortable and usable room than to have **Smart Glass**. Please refer to the energy chart above to select which **Smart Glass** is best for you. Also, our sunroom and enclosures come standard with 1" thick insulated glass units. They are 33-50% thicker than industry standard insulated glass and are the ideal thickness for high performance glass.

## 3 DURALite ROOF AND WINDOW GLASS

Standard in all our sunrooms and enclosures, see detailed demonstrations on page 29. This glass is especially formulated for C-Thru and is nearly indestructible. In most sunrooms you have as many windows in that one room as you do in an entire home. Because of this, safety should be a #1 concern, **Duralite Glass** is your answer.

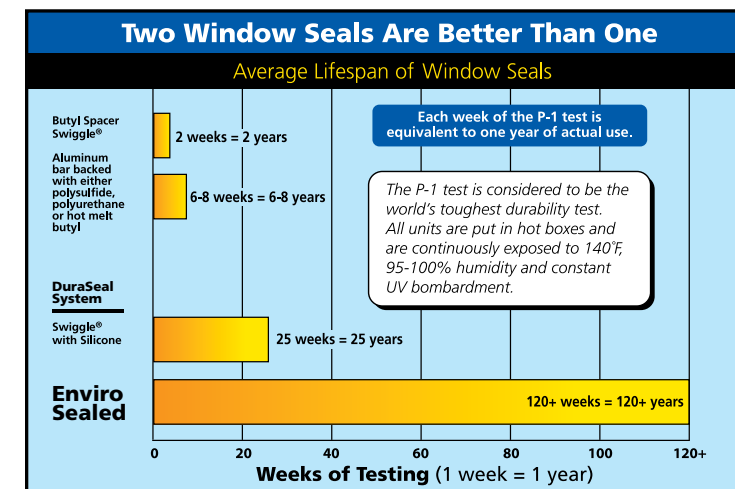

enviro sealed ENERGY STAR  
windows™ and doors with Duralite®

**Metal Window Seal** with condensation  
**Enviro Window Seal** no condensation

When you see condensation inside a dual-glass window, that means the seal has failed. Our exclusive high-performance dual glass is made using the latest technology in dual glass seals.

- Helps eliminate the possibility of mold
- Rated as the longest lasting insulated glass seal at 120+ years (see chart)
- Helps eliminate the possibility of condensation

**DURALite**  
BY C-THRU ROOF & WINDOW GLASS

Available only from C-Thru, our exclusive DuraLite glass comes standard throughout our rooms.

Up to:

- 8 times stronger than residential window glass
- 10 times more scratch-resistant than acrylic
- 2 times more clarity than other glass
- Safer for your family and virtually indestructible!

How strong is DuraLite? Even with nearly 400 lbs. of weight, DuraLite won't crack or break.

How durable is DuraLite? Even striking it against this nail, DuraLite remains unmarked and unbroken.

# Features: Continued

Even a screwdriver can't scratch the paint off – because the color is impregnated into the material!

Tuff-Core is made of *expanded polystyrene*, the same material used in freezer walls, refrigerators, coolers, etc. The energy conserved in heating and cooling quickly pays for itself. To compare its insulating capabilities to other materials, 3" of Tuff-Core is equivalent to:

- 8" of fiberglass
- 15" of hardwood
- 72" of brick

The outer Tuff-Core "skin" is as strong as it is beautiful and is:

- Maintenance free
- Flexible and durable
- Moisture-resistant
- Scratch and ding-resistant – It's nearly indestructible!

Tuff-Core is standard for our Curved and Straight Eave roofs, and optional for the solid wall area.

The superior insulation properties of Tuff-Core used in all C-Thru room walls means superior energy savings for you.

# Product Options: Continued

## Step 3: Choose Your Room Options

### Exclusive Patented U.L. Listed Electrical System

C-Thru's patented electrical system allows you to place outlets practically anywhere without unsightly conduit or extension cords.

- C-Thru's electrical system is UL listed, safe and legal
- Each electrical system comes with a ground fault interrupter (GFI)

Porch Lights

Electrical Outlets

Light Switches

Hidden Electrical Raceways

Glass Transom

Standard Solid Kickplate (area below the windows)

Optional Glass Kickplate

### Glass Kickplate and Transom Options

Solid insulated kickplates (area below the window) and transoms (area above the windows) are standard on all rooms. The glass kickplate and transom are upgrade options to the standard rooms.

- Great way to bring extra light and yard into your room
- Glass kickplates & transom options can be done separately from each other

### Glass Roof and Shade Option

This unique option allows you to design your sunroom roof with combinations of glass and insulated solid panels. Combined with our exclusive Comfort Control retractable shade system, you can control the light and temperature of your room.

- Solid roof sections are highly insulated roof panels that allow for year-round use and low maintenance
- Glass options are single glazing or the high-performance 7/8" dual insulated Smart Glass
- You can design your roof to be all glass, all solid, 1/2 glass – 1/2 solid and more!
- Comfort control shades are maintenance-free and fully insulated to reduce heat gain

**BEST**

OMEGA IV 90 Vinyl room system with C-Thru's new generation of energy efficient vinyl windows and structural thermal clad framing containing SmartGlass 90 with Duralite glass. C-Thru windows have nearly 1400 times better insulation than aluminum windows, equaling energy savings and noise reduction. Room comes complete with a lifetime limited material warranty.

### Door Options

There are three available door options and all come with great innovative design features:

- Swing doors are 1-3/4" thick and come standard with nickel plated hardware
- Continuous Q-lon weather stripping around door jamb and threshold – keeps wind and cold air out
- The easy-to-operate sliding door is a welded vinyl with continuous weather stripping locking out the weather

### Ceiling Fan/Light Beam Option

If you plan on putting a ceiling fan or hanging lighting in your new room, this upgraded beam option is a must.

- Provides a structural location to attach fixture
- Allows wires to be concealed in the hollow of the structure
- Eliminates conduit on the top of your roof

# Our Story

C-Thru Industries (formerly known as C-Thru Aluminum Awning Co.), was founded by Stanley J. Albany in 1947. One of his basic business philosophies was – “Our customers deserve a quality product at a price they can afford.”

Being one of the pioneers in the patio industry, Mr. Albany’s contributions were great. Soon after establishing C-Thru, he was advertising and distributing the louvered window awning nationally. In the mid 1950s, he saw the need for quality and ethical standards to be set for the growing industry. To accomplish this, Mr. Albany helped form the first Manufacturing and Retail Trade Association, to which he was elected its first president.

C-Thru then led the pioneering effort in producing such items as the structural aluminum patio cover, the patio room enclosure, safe integrated electrical raceway systems, and finally, the finest sunroom in the industry.

Mr. Albany passed on his belief in business integrity, and a legacy of “quality without compromise” to his two sons in December 1988. Kirk and Jason Albany are carrying on this heritage by maintaining the same high standard.

In 2010 Jason’s son Joshua came to work at C-Thru starting the 3rd generation, a Legacy to continue.
